

Proportional 3-Way Pressure-Reducing Cart., Size 4

$Q_{max} = 20 \text{ l/min}$, $p_{max} = 210 \text{ bar}$
 Direct acting, electrically operated
 Series DRRY-7020... to 7100...

- Compact push-in cartridge construction for cavity type AG
- Operated by a proportional solenoid
- 4 pressure ranges available
- Excellent stability over the whole pressure and flow range
- All external parts zinc plated, passivated (CrVI-free)
- High pressure wet-armature solenoids
- Various plug-connector systems and voltages are available
- Can be fitted in a line-mounting body

1 Description

Series DRRY-70... proportional 3-way pressure-reducing cartridges are direct acting, spool-type, push-in cartridges and are available in size 4. They reduce the outlet pressure in A as a function of the control current signal and independently of the inlet pressure in P. In the initial position (solenoid de-energised) the inlet of the 3-way pressure-reducing cartridge is shut off and the outlet is connected to tank (port A → T). In control mode, the connection P → A opens until the pressure in port A reaches the preset level. If the pressure rises above the preset level, the control spool opens the A → T connection until balance is attained. Four pressure ranges are available, with maximum operating pres-

sure (inlet pressure) $p_{max} 210 \text{ bar}$. These 3-way pressure-reducing cartridges are predominantly used for reducing a system pressure in mobile and industrial applications. They are suitable for controlling larger directional valves, where they can be incorporated in the valve body or directly in the end covers, for example, and for controlling pumps and motors. All external parts of the cartridge are zinc plated and passivated (CrVI-free) and are thus suitable for use in the harshest operating environments. If you intend to manufacture your own cavities or are designing a line-mounting installation, please refer to the section "Related data sheets".

3 Technical data

General characteristics	Description, value, unit
Designation	proportional 3-way pressure-reducing cartridge
Design	direct acting, electrically operated
Mounting method	push-in cartridge, 4 mounting bolts M4x50
Tightening torque	2.6 Nm ± 10 %
Size	nominal size 4, cavity type AG
Weight	0.55 kg
Mounting attitude	unrestricted (preferably vertical, coil down)
Ambient temperature range	-25 °C ... +50 °C

Hydraulic characteristics	Description, value, unit
Maximum operating pressure p_{max} (inlet pressure)	210 bar, all pressure ranges
Flow range	...20 l/min
Nominal pressure ranges p_N <ul style="list-style-type: none"> - model "100" - model "050" - model "030" - model "020" 	...100 bar ...50 bar ...30 bar ...20 bar

6 Installation information

IMPORTANT!

When fitting the cartridges, note the mounting attitude (preferably vertical, with coil down → automatic air bleed) and use the specified tightening torque. No adjustments are necessary, since the cartridges are set in the factory.

ATTENTION!

Only qualified personnel with mechanical skills may carry out any maintenance work. Generally, the only work that should ever be undertaken is to check, and possibly replace, the seals. When changing seals, oil or grease the new seals thoroughly before fitting them.
